JPL And The American Space Program: A History Of The Jet Propulsion Laboratory (The Planetary Exploration Series)

Synopsis

Hardcover: 320 pages Publisher: Yale University Press (September 10, 1982) Language: English
ISBN-10: 0300024088 ISBN-13: 978-0300024081 Product Dimensions: 9.3 x 6 x 1.3 inches
Shipping Weight: 1.6 pounds

Book Information

Series: The Planetary Exploration Series

Hardcover: 320 pages

Publisher: Yale University Press; 1st Edition edition (September 10, 1982)

Language: English

ISBN-10: 0300024088

ISBN-13: 978-0300024081

Product Dimensions: 1.2 x 6.5 x 9.5 inches

Shipping Weight: 1.6 pounds

Customer Reviews

I confess I'm only about half way through this book. It was written in 1982 and starts the story with the predecessor of JPL in Pasadena, GALCIT, in the 1930s. Koppes shows in great detail how a few individuals in Pasadena started research on rockets that to some extent paralleled what Robert Goddard was doing in New Mexico. Goddard, however, was a loner and refused to share his results with anyone while Karman, Malina and others at JPL went on to form the mainstream of rocket development in the US before and during WWII. By the time Sputnik was launched, JPL had Wehrner von Braun & his team of rocket engineers to contend with. They had done a lot of work on telemetry and celestial navigation in the early '50s so they moved away from the propulsion end of space travel into satellites and interplanetary exploration. The book is filled with details of launches and budget fights but never in a way that is dry or boring. I'll come back and update this review when I finish it!
