# Arduino LED Projects

## Synopsis

Many projects for your Arduino that use LED's, such as quiz machine, wheel of prizes, LED arrays, and others

## Book Information

Paperback: 98 pages

Publisher: CreateSpace Independent Publishing Platform; 1 edition (March 31, 2013)

Language: English

ISBN-10: 1490980679

ISBN-13: 978-1490980676

Product Dimensions: 7 x 0.2 x 10 inches

Shipping Weight: 8.6 ounces (View shipping rates and policies)

Average Customer Review: 4.8 out of 5 stars [See all reviews](#) (5 customer reviews)

Best Sellers Rank: #753,596 in Books (See Top 100 in Books) #281 in [Books > Computers & Technology > Hardware & DIY > Single Board Computers](#) #293 in [Books > Science & Math > Physics > Optics](#) #1558 in [Books > Engineering & Transportation > Engineering > Electrical & Electronics > Electronics](#)

## Customer Reviews

A little stodgy but that's not bad.

Delivered on time and in good shape. Good how-to book on LED/smart lighting projects

Great projects! Plenty to stimulate the mind and keep those fingers busy. Well grounded from basics to the technicals. Good deal.

I purchased a few LED displays from the author to play with, and to try to get my 10 year old daughter interested in programming. We were able to get the display up and running relatively easily with an Arduino, and my daughter had fun learning how to make graphics and the program to display them. It's very easy, even if you don't know anything about electronics; a great starter project, and very rewarding to see the finished product.

I like that this was written in plain English. It was very easy to follow - including the code. For someone just starting, these are great projects (read: affordable).
